

PROFILE

Dough Equipment Manufacturing Co. Ltd. Is a company who is best known for manufacturing high quality dough equipment including the dough press machine and turnover machine.

The company has been established back in 2014 and that means that we have been serving in this industry for nearly 3 years already.

With the help of our company's talented, knowledgeable and experienced designers and engineers, we are able to come up with a machine that would be beneficial for small business companies who are selling folded dough products like pies, patties, Chinese dumplings, turnovers, etc.

We fully believe that our products would serve as a solution for these companies to be able to produce more folded dumplings at a much faster rate.

TURNOVER MACHINE

TURNOVER MACHINE

DEM-10

The main reason why we have decided to design and manufacture our DEM-10 turnover machine was to simplify the process and reduce the labor intensive production of patties and turnovers. We are aware of the fact that these two are popular with customers but with the fact that it requires a lot of labor and time, companies, especially the small ones and the start-up companies find it hard to make it profitable.

FAST AND EFFICIENT PRODUCTION

With this machine of ours, a fast and efficient production of different kinds of sweet and savory turnovers is very much possible. Consistency of the finished products with great speed and precision can also be ensured.

EASY AND SIMPLE OPERATION

You would not have a hard time training your employees on how to use the machine for it has an easy and simple operation. In fact, it would only take a minute for them to be able to master how to operate it and with that, you can start creating big profits for your business.

PERFECT SEAL ENSURED

In making dough products, it is always very important to seal its edges. With the DEM-10 turnover machine, a perfect seal can be expected at all times, which means that there is no need to use egg wash or other sealants to brush the edges to make it easier to seal them.

Machine Size: L 490 * W 228 * H 268 MM

Packing size: L 500 * W 270 * H 280 MM

Net weight: 9.5 Kg

Gross weight: 10.5 Kg

Production: 600 PCS/Hour

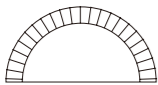

Material: All 1.5 mm Thickness Stainless Steel 304

FEATURES

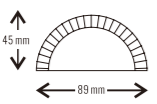

1. All Stainless Steel 304 Body without Rust;
2. Saving Material to Make the Dough and Filling;
3. 500 - 700 pieces production per hour, to save labor work and sell more;
4. The dies are available to be customized according customer's requirement;
5. Variable dies are able to use for various shapes and sizes;
