

CAKE DISPLAY CASE COMPARISON

BETWEEN TWOTHOUSAND'S CAKE SHOWCASE AND OTHER BRANDS

TWOTHOUSAND MACHINERY would like to do this comparison due to the unreasonable low price of the refrigerated showcase in the market. We are always doubted by the clients, they thought we quoted a very high price. We think it is not fair to compare the prices only.

As you know, China can do anything with any price, you will get the goods with the value you paid.

You don't think so? please check the comparison as below:

Note:

TT brand stands for the TWOTHOUSAND Brand

C brand stands for the cheap refrigerated showcase

1. Fasten Screw Comparison

TT brand's fasten screw is well installed

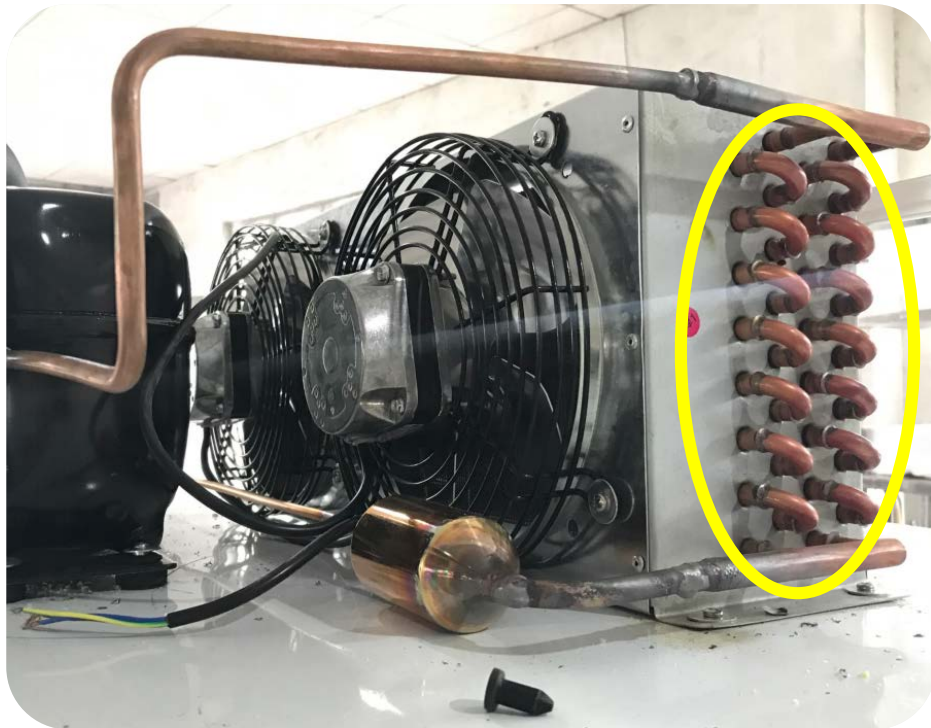

C brand's fasten screw is easy to loose.

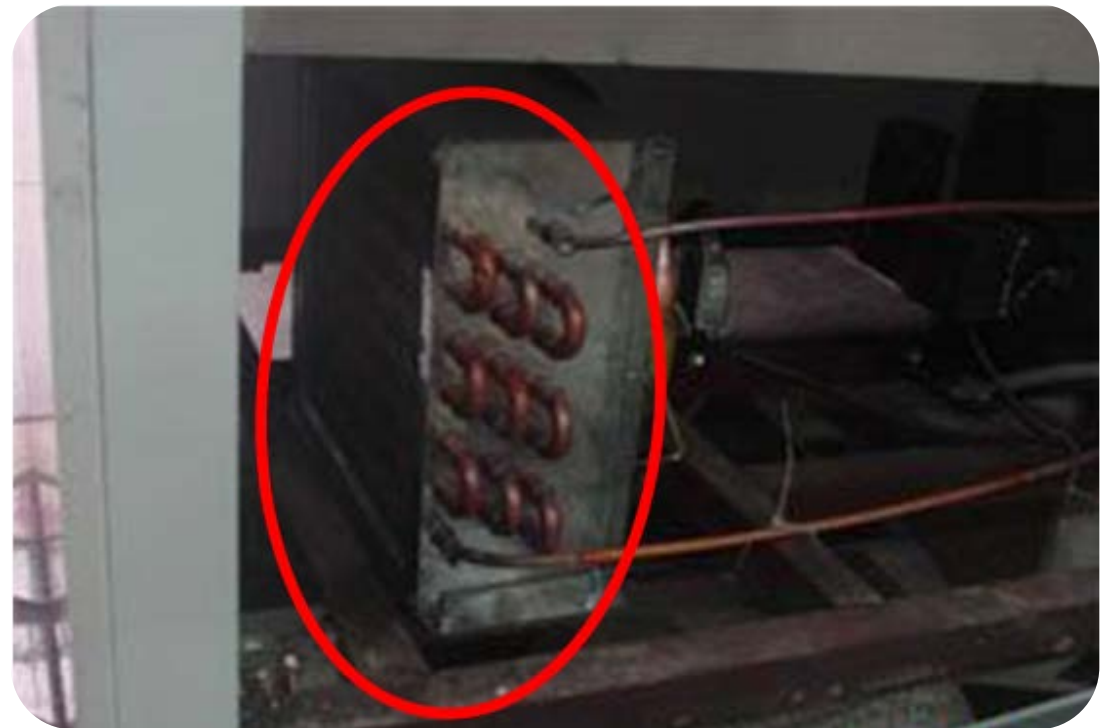

2. Condenser Comparison

TT brand's condenser with more cooper pipes

C brand's condenser with less cooper pipes and the cooper is very thin

3. Door Railway Comparison

TT brand's door railway is made in aluminum and plastic, it is much more durable.

C brand's door railway is made in plastic only, easy to wear.

4. Showcase Tank Comparison

TT brand uses the one-time molding & integral PU foaming tank, it is heat insulation and environmental friendly

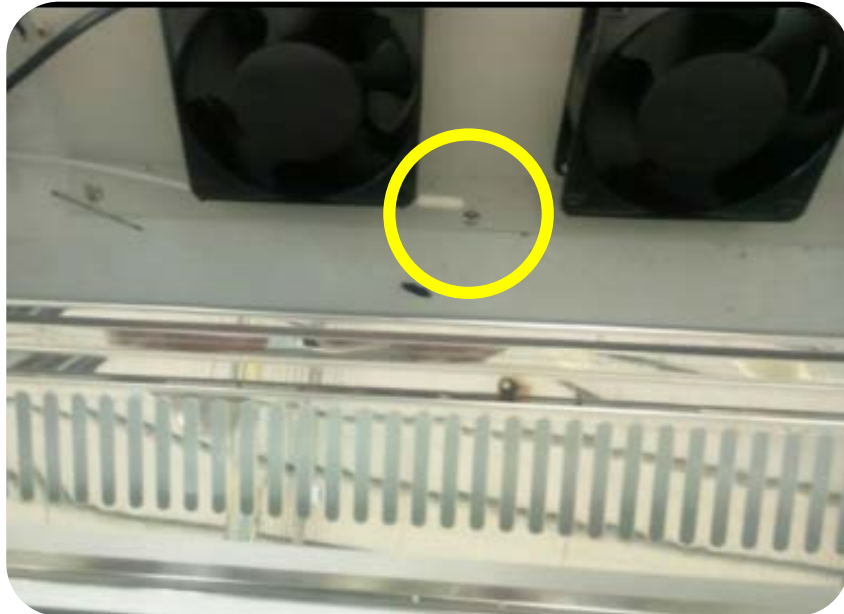

C brand use the Styrofoam and wood panel as the tank, it is not water proof and environmental friendly.

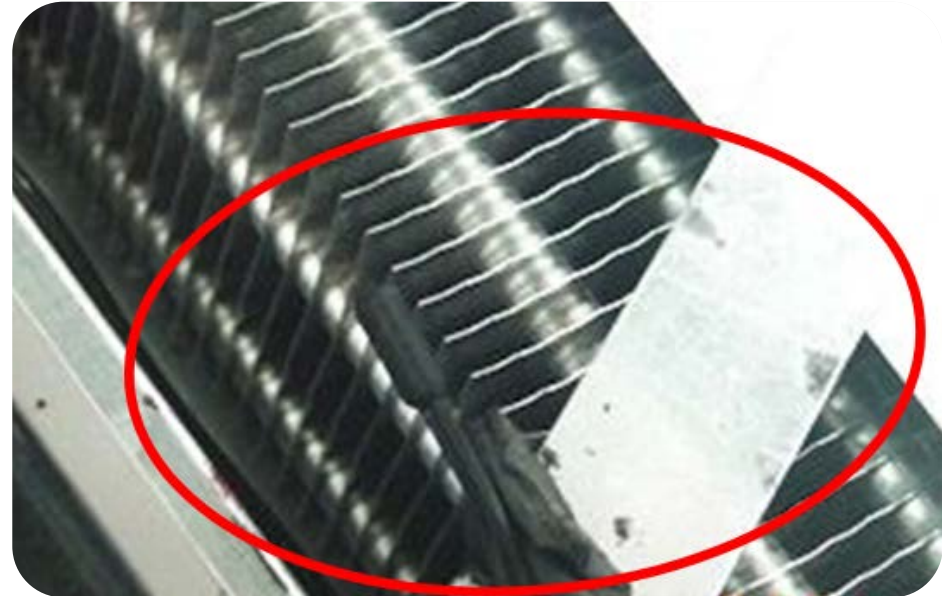

5. Temperature Probe Comparison

TT brand place the temperature probe on the air inlet position, the highest temperature place, and it controls the temperature difference among the cabinet less than 1 °C

C brand place the temperature probe on the evaporator, the lowest temperature place, it is not the real temperature of the showcase.

6. Temperature Display Comparison

TT brand have temperature display on front and back

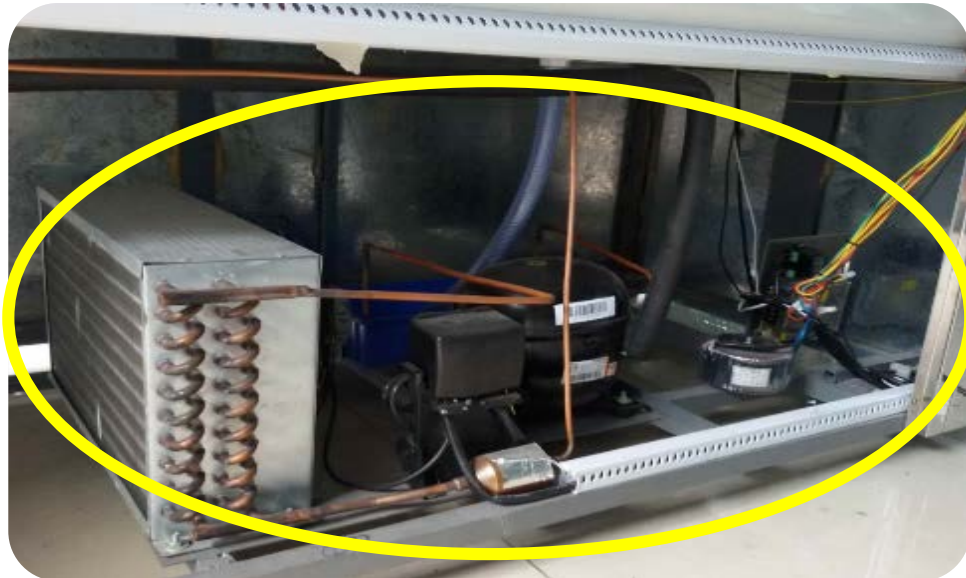

C brand only have the temperature display on the back

7. Condenser Units Installation Comparison

TT brand installs the condenser units in order, it is clear and easy for maintenance

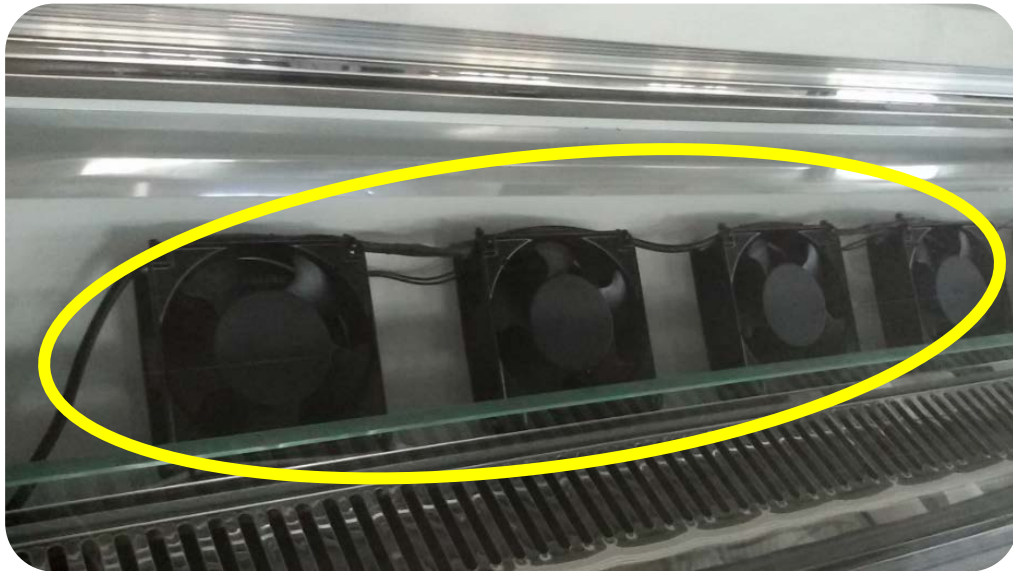

C brand installs the condenser units in a mess, the wires are not connected in order

8. Evaporation Fan Comparison

TT brand's 1.2 meters long cake showcase installs 4 evaporation fans

C brand's 1.2 meters long cake showcase install only 2 fans

9. Evaporation Cooper Pipe Comparison

TT brand's 1.2 evaporation with more cooper pipe, the refrigerating capacity is big, and the temperature can drop to the set

C brand's evaporation with less cooper pipe, the refrigerating capacity is less, and the temperature is dropping very slow.

11. Shelf Support Bar Comparison

TT brand's shelf support bar is aluminum and can be adjusted

C brand's shelf support bar is plastic and can't be adjusted
